

EASYCONNECT ROVER™

Secure Point-of-Sale for Motion PC

The EasyConnect Rover™ is a peripheral for your Motion x5 machine for extended Personal Identification Number (PIN) entry and magnetic card stripe data capture capabilities. Enables a POS system to accept card present, PINned transactions, and allows any system to carry out a secure online PINned authentication. Light, compact and robust, EasyConnect Rover™ is designed with both ease of use and security in mind. Perfect for use in traditional merchant-operated environments such as retail shops, restaurants, and gas-stations.

SECURITY FEATURES:

- PCI PED v2.1 certified
- Secure PIN Pad for PIN entry
- Magnetic Card Swipe reader: Track1 and Track2 data capture with optional encryption
- Three LED indicators and buzzer for feedback
- Communication method: USB
- Real Time Clock
- Two Key Management Options: DUKPT or Master-Session
- Triple Data Encryption Standard (TDES) encryption
- Optional first 6, last 4 digits of card number for verification and receipt print purpose
- Robust, compact and light
